INSPIRING HOUSING PROJECTS FROM SAPA BUILDING SYSTEM

Adding value and architectural excellence to every project has been Sapa Building System's mission from the beginning. That is why we provide market leading architectural aluminium solutions that are innovative, energy efficient and environmentally sustainable.

## THE NATURAL CHOICE FOR YOUR HOME

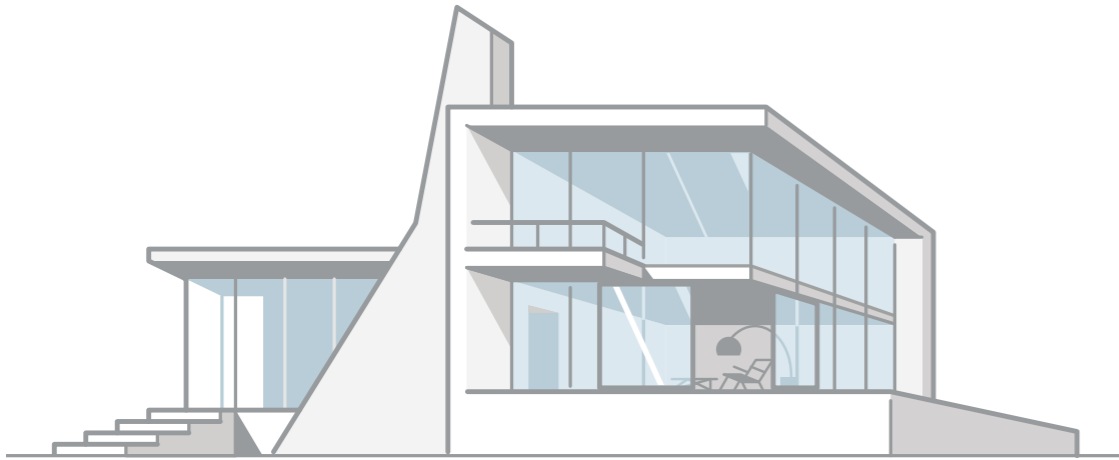

Aluminium is the perfect durable material for your home. It is strong, lightweight and will never rust. Sapa Building System durable materials and powder coatings retain their performance throughout their lifespan. And because of its slim profiles and ability to be shaped in flexible ways, aluminium lends itself naturally to modern architecture.

Do you know what is so fantastic about aluminium? It never compromises on comfort and performance: the thermal insulation performance of Sapa Building System's products is guaranteed by an insulated core that separates the outer from the inner material. This multi-layer system optimises your home's thermal insulation.

From an environmental point of view as well, aluminium is an excellent eco-friendly choice: it is infinitely recyclable without showing signs of degradation or loss of its unique and unmatched physical properties.

And as if that wasn't enough, aluminium systems require a minimum of maintenance: just wash them with water and a little soap, and you're all set again to enjoy spectacular views.

## DESIGN YOUR HOME , TO MAXIMISE THE LIGHT

Planning a new home or a renovation project? Rest assured that Sapa Building System has the perfect solution for your aluminium windows, doors, sliding systems and conservatories.

Sapa Building System frames are renowned for their minimalistic design. Available in a wide range of colours, they blend seamlessly with every type and style of home. Newly built or renovated, classic or modern, rural or urban: you will undoubtedly find the perfect solution for your dream home in our comprehensive range of products.

Aluminium is a light, strong and durable material. It is perfectly suited to create systems with a slim sightline, even for extra large solutions to let in plenty of natural light. Add our integrated innovative solutions, and the result is a home where living is always comfortable, safe and pleasant.

Do not hesitate to approach Sapa Building System, whatever your project and however challenging your requirements are. You will find in Sapa Building System a partner you can fully rely on: our Avantis 95 line of doors and windows, which achieved the prestigious Passive House Certificate, is only one example among the many top-quality products we have developed over four decades of a tradition based on excellence.

Need inspiration? Take a look at the back of this brochure and discover just a few of the many possibilities offered by our aluminium solutions.

# MAKING EACH ONE OF YOUR DREAMS COME TRUE

Windows and doors, sliding systems, conservatories, etc.: Sapa Building System offers an extensive range of innovative aluminium systems, all with one sole purpose: to fully satisfy your housing needs. Ensuring excellent thermal and acoustic insulation, solar protection and automatic ventilation, as well as fire and burglary protection, the Sapa Building System range will give you all the creative freedom you need to realise each one of your ideas.

## HIGH-PERFORMANCE WINDOWS AND DOORS

## Enjoy a home full of light and comfort

Are you dreaming of a home that is bright and cosy at the same time? That feels warm, safe and peaceful? Rely on Sapa Building System. You will find in our lines of high-performance windows and doors the ideal solution for your home.

The **Avantis series** is designed and manufactured to exceed the highest requirements in terms of insulation, performance, design and comfort. Available in different building depths to meet your most stringent standards for thermal insulation, the Avantis windows and doors are perfectly compatible with other products in the Sapa Building System range.

Only the best is good enough? **Avantis 95** is our system for passive housing and near zero-energy constructions. It offers a highly weatherproof solution, rating at the top of wind, water and airtightness classes. Last but definitely not least, its excellent thermal values also make it a highly energy-efficient solution.

## CONSERVATORIES

## One Top range, three choices

Any home extension should blend in with both the style of your house and your personal taste. Our aluminium systems do just that. Timelessly traditional, with a sleek design or a typical authentic look: the Sapa Top product line, available in almost any colour, fits in seamlessly in every construction style, while respecting the character of your home.

**Top View** is the perfect conservatory system if you love modern architecture and the feel of outdoor living. The insulated aluminium lantern roof light creates a sleek design while opening up spectacular views of the sky. The slim profiles and roof ridge structure maximise the flow of natural light.

**Top Line** is an aluminium system for tasteful and intelligent home extensions. The modular structure offers unmatched flexibility in terms of construction. Almost every type of residential extension is possible, from a modest porch to a lavish sun room.

**Top Eco** is a range of profiles and accessories for pergolas: ideal to immerse yourself in the surrounding nature. The system is also compatible with all Sapa Building System sliding doors and windows, allowing you to upgrade the pergola into a fully-fledged conservatory at a later stage.

## SLIDING AND FOLDING SYSTEMS

### Elegantly bringing the outside in

The boundaries between our home and garden keep blurring. The indoors spill outdoors and vice versa. If you want to enjoy the beauty of nature without compromising on living comfort, Sapa Building System sliding and folding systems are what you need. The slim sightline of the aluminium profiles maximises the feeling of light and space, while the built-in innovative technologies ensure optimal safety, durability and weather resistance. This results in a harmonious environment that immediately feels like home.

Take our **Artline** range, for example: the impression of extreme simplicity and lightness of Artline is the result of our focus on the interaction between glass, frameless windows and the careful architectural consideration of spaces where 'light is more'. Artline's sophisticated minimalistic design creates a lightweight and flowing appearance, even for large fixed or openable windows. Creative in its design and effect on the building and the user, Artline epitomizes contemporary architecture.

Or why not open up your home with an aluminium sliding folding door? It is a great way to bring your living space and garden together, opening up wonderful new possibilities to make the most of your home. Our new **Crown Sliding Folding door** is the perfect solution. Crown Sliding Folding doors feature advanced technology, combining the structural integrity of aluminium with a high performance thermal break, keeping you insulated from the most extreme elements. Our versatile combination of hinged and folding panels is designed to give you perfect control over the way you use the door.

## S-LINE HANDLES

### Design, durability and ease-of-use

Handles are the first objects we touch when opening a door or window. As a true visual signature, they set the standard for your entire home. Like you, Sapa Building System will not settle for anything but the best.

Design, comfort of use and long lasting: the Sapa Building System S-Line handles for windows and doors combine elegant lines with perfect finish – resulting in a comfortable and robust feeling. Our patented mechanisms make sure they will perform reliably over their long lifespan. And with its extended range of high quality materials and sleek designs, our S-Line system will fit perfectly with every style of home.

# ADDING COLOUR TO YOUR LIFE

The Sapa Building System solutions are finished with a powder coating, a process by which powder paints are sprayed onto the aluminium elements. Our powder coated profiles offer high weather resistance as well as a beautiful appearance.

Whatever the weather throws at them, our finishes are guaranteed to last, never showing signs of degradation. In addition, the powder coating adds to the excellent thermal properties of the aluminium systems and is completely safe for the natural environment.

Our products are available in a wide range of colours. With no less than 430 standard colours and the possibility to customise using every possible RAL colour, you can be confident we will have the right shade of paint to suit your style.
